## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, drawn to a network for regulating the transfer speed between a TFTP server and a group of clients based on an established threshold and client values, classified in class 709, subclass 233.
  - II. Claims 8-9, drawn to a network for recovering from errors caused by a particular client, classified in class 714, subclass 4.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as regulating the transfer speed of a network based on comparisons between monitored speed values and a threshold value. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
5. A telephone call was made to Mark Kachigian (Reg. No. 32,840) on 6/14/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2142

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
